

*Since 1933*

Potential Water Well Customers:

We appreciate your request for an estimate from Tacoma Pump & Drilling Co., Inc..

Should you decide to accept the enclosed estimate for our services, we will need the following to proceed with your drilling project:

- Please read both sides of the estimate/contract. Sign and date where indicated.
- The Model Disclosure Statement must be signed and returned.
- We require 50% (down payment) of the total in advance, the balance upon completion, unless other arrangements are made in advance. A letter from your lender is required if the project is financed.
- Please note the diagram of the rig configuration (on the following page). We require the driveway and well site to be fairly level and can hold at least 70,000 lbs.
- A **Map** and **Site Address**, including a **Legal Description**, is necessary to complete the Department of Ecology paperwork.
- As a service to our customers, we will submit the **Notice of Intent to Construct a Water Well** to the Department of Ecology, using the above information.
- Some counties issue a **Water Source Site Approval Letter** which authorizes us to proceed. It is your responsibility to contact the county, and to find out how that county's regulations apply to you.
- **Upon completion and payment of your well, we will provide you a copy of the State Water Well Report for your records.**

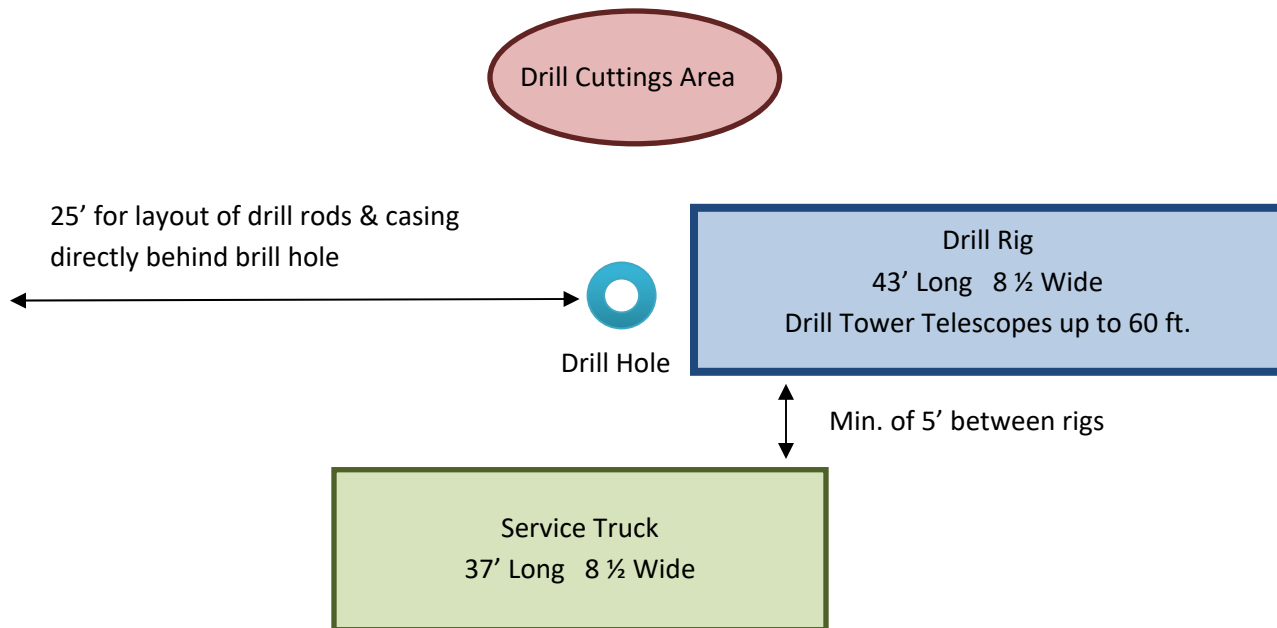

We are doing our best to simplify the drilling procedure and offer the best service possible.

Please keep in mind, that due to the nature of our work and the drilling process, occasional delays or interruptions are unavoidable.

Your patience, understanding and cooperation are very much appreciated.

Thank you very much for the opportunity to offer our services. We look forward to hearing from you.

## Preferred Drill Set Up – Site Preparation

**NOTE:** No more than 2' of elevation on a 40'

### **Formost DR-24 & DR-24HD**

[www.Formost.ca](http://www.Formost.ca)

1. Products
