

Well Driller's Statement –

The attached form is to be completed and signed by both the permit applicant and the well driller. This document is used only when the well to serve the proposed development has not been drilled. The statement simply indicates that water is available on the site, based on the well driller's experience and knowledge of the area. This statement may only be used for individual wells serving only 1 residence.

Once the well has been drilled the applicant will need to submit a copy of the well driller's well report and copies of the water test results.

Date: _____

Tax Parcel # _____

Permit Application # (if known) _____

Property Owner/Applicant (Name)

Building Site Address (Number & Street)

(City, State & Zip)

To Whom It May Concern:

This letter is to indicate that I have knowledge of the water resources and availability in the area proposed for this well. While no guarantee can be given, nor assurance of continued water availability from this well, I am confident from previous experience and/or information about ground water in this general area, that an adequate quantity of potable drinking water can be obtained. It should be understood that ground water may contain naturally occurring minerals that can influence the quality of the water. Treatment is generally available to enhance the potability of the water to suit the resident when the mineral content is objectionable.

This letter has been prepared to help meet water availability requirements monitored by the Lewis County Building Department. This letter and a contract with my company to drill the well should meet the water availability requirements to allow issuance of the permit. **By our signatures below, we understand that final inspection approval will not be given and occupancy of the building will not be allowed until the bail test and potability tests have been completed and copies have been submitted to the Lewis County Building Department.**
